

California Technical Bulletin 117 Section A, B and C – Pass

California Standard Technical Bulletin 117, is a state regulation that mandates the requirements, test procedure and apparatus for testing the flame retardance of resilient filling materials used in upholstered furniture.

The resilient filling materials (cellular material, non man-made filling material, shredded and loose down and feathers, man-made fibers) used in this product meet the requirements of CAL 117, Section A, B and C.

The textile used as the covering material for this product is not included in the resilient filling materials test. The textile being used as covering material must be independently checked to determine if it passes corresponding CAL 117D.

Please contact the supplier of the COM directly to determine the flame retardancy of any COM supplied to us or used on this product.
